Earthquake

- In an earthquake, take cover immediately under a table, desk or counter. If it moves, move with it, holding the legs. Turn away from windows or glass panels.
- The children should keep quiet and listen for further instructions.

Earthquake Drill

It should be emphasised that, in an earthquake, students should remain in the building until the shaking has stopped and/or the 'all clear' is given by the teacher.

Teachers use the word 'DROP' to indicate the beginning of an earthquake drill for their class. Students should take cover under a sturdy desk or table, if one is near, and hold on to its legs. If no desk is available, they should drop to their knees [away from windows]; keep their knees together; clasp both hands firmly behind their heads [bowing their heads]; bury their faces in their arms, protecting their heads; close their eyes tightly; and stay in position until it is safe to move. If students cannot move away from windows they should turn away from the glass to minimise injuries from broken glass.

Safe Distance

If the signal to evacuate the building is given, all occupants should proceed to the agreed assembly point, which must be at a safe distance from any buildings and other potentially dangerous structures, such as power poles and water tanks.

Rooms 1, 2, 3, 4, 5, 6, 14, Hall to the Top court above the Administration Block.
Rooms 7, 8, 9, 10, 11, 12, 13 Library/resource to field.

A safe distance is:

- 20 metres from a single storey building
 - 40 metres from a two storey building
- Keep well clear of all overhead power lines.

<p>Do not move until the shaking has stopped and the Principal or Team Leader tells children and other teachers to move.</p>
